

Vaccination status

At IJF and EJU events a person is considered fully vaccinated if fulfils any of the following criteria.

	Type of protection	Minimum time elapsed	Maximum time elapsed
1st series of vaccination	1 dose (Janssen, Sputnik Lite, or other)	Minimum 28 days from receiving the dose	Maximum 6 months from receiving the dose
	2 doses of any 2 dose vaccines	Minimum 14 days from the 2nd dose	Maximum 6 months from the 2nd dose
	Recovery from infection and 1 dose	Minimum 14 days from receiving the dose	Maximum 6 months from receiving the dose
	1 dose and recovery from infection	Minimum 11 days from the positive PCR	Maximum 6 months from the positive PCR
Additional series of vaccination	Booster/revaccination dose(s)	From the day of vaccination	to be determined by the WHO, currently no end of validity
Recovery	Recovery from infection	Minimum 11 days from the positive PCR	Maximum 6 months from the positive PCR

Minors (under 18) are considered fully vaccinated after completing the first series of vaccination with no end of validity until further decision.

Where the protection level is expressed by a fraction number, a quotient of the number of received doses / number of required doses, all with the sum higher than 1, eg. 2/1, 3/1, 3/2, etc. are also considered having the booster dose. Please, indicate by selecting "3rd dose" in my.ijf.org

Vaccination validity is subject to change according to WHO recommendations.

Please, note that host country vaccination criteria may differ from the IJF's,

always check the local rules before travelling.
